STEPS TO REMAP AVIATION AND RELATED SITEGROUPS TO VAREC

- 1) Hierarchy change:
 - i. Create a new hierarchy Site-to-Site mappings from Varec to all the Site and Site groups under Aviation.
- 2) Change entity ownership from Aviation to Varec
- 3) Copy all Entity-to-Site mappings assigned from Aviation, to Varec (with Varec being now the AssignedFromSiteGuid)

- 4) Modify Aviation siteguid data in the identified dbo schema tables and assign them the Varec siteguid. (See: *TABLES WITH AVIATION SITEGUID ASSIGNED DATA - page 2*)
- 5) Validation of Changes:
 - i. Development validation – Data integrity: All data that was re-mapped from Aviation siteguid is now mapped to Varec. There are no orphaned records, no table constraint errors.
 - ii. QA Validation – Application functionality & reports where applicable for all related entities and transactional data that was previously re-mapped from Aviation to Varec.
- 6) Data Cleanup:
 - i. Delete all site-to-site mappings to and from Aviation.
 - ii. Delete Aviation Site
- 7) Validation Changes: Repeat Step 5.
